

Elgin Ranks Among Fastest Growing Suppliers

Leading Engine Builders Turning to Elgin® & Elgin PRO-STOCK® Parts

Building on its leadership as a global OE manufacturer, Elgin Industries has become one of the fastest growing sources of premium-quality replacement parts for North American engine builders. The company's Elgin®, Elgin PRO-STOCK® and Elgin BLACK ICE™ brands are helping engine builders increase quality, productivity and

profitability through an extensive line of world-class valvetrain and related components for virtually any domestic or import application.

"Our parts are now the leading choices of global engine manufacturers, and our U.S.-based engineering and manufacturing operations ensure that every part delivers the quality, performance

and value our customers demand," said Rick Simko, sales and marketing manager for Elgin.

From the industry's most extensive portfolio of custom camshaft grinds to complete valvetrain packages for today's most

popular engines, Elgin offers OE-quality stock and track-proven performance technologies that deliver unsurpassed precision, strength and bottom-line value. And each of these thousands of parts is available right now through your Elgin distributor. To learn more, visit www.elginind.com or call 1-800-323-6764.

BREATHE DEEP
